

## MK Clamping Element

Pneumatic clamping element, designed to be used for holding a position when using linear rail guides. Energize to close (NO).

Compatible with Linear Rail HRC/ARC/ERC only.

Because of the height difference of different rail guide blocks and to ensure the proper function of the MK Clamping Elements, the use of adapter plates is sometimes needed. See document "Selection of Clamping Elements" for individual block types and whether an adapter plate is needed.

Dimensions in mm.

For other types contact Rollco.

**Temperature range (°C):** From -10 to 70°C
