## Constant radius rail and slider system

## Variable radius rail and slider system

Note: Data for angles and respective radii are in sequential order.

Note: Information for right and left side installation and for expanded surface protection is only necessary if required. Rail lengths and radii always are indicated with four digits, angles always with three digits and a zero as prefix. Exact specifications (layout, angle, radius, hole pattern, etc.) must be represented in a drawing.

## Slider

CCTO8 - NIC

Slider type

Expanded surface protection (if other than standard)

## Constant radius rails

## Variable radius rails

Note: Data for angles and respective radii are in sequential order.

Note: Information for right and left side installation and for expanded surface protection is only necessary if required. Rail lengths and radii always are indicated with four digits, angles always with three digits and a zero as prefix.
